ARTAS ALAJBEGU

(201) 888 8525 • artas.maximus.a@gmail.com • Portfolio

Data Engineer with a background in ETL pipeline design and a strong visual sensibility. Focused on building data products that transform complex datasets into clear, interactive interfaces

Education

Carnegie Mellon University · Pittsburgh, PA 2019 - 2023
Bachelor of Science, Mathematical Sciences • Computer Science Minor • MCS College Honors

Experience

Data Engineer · Optimove 05/25 - Present

- Proposed, designed, and delivered a Streamlit-based interactive data profiling report, replacing a brittle Jupyter environment with a self-configuring UI that auto-infers analysis parameters and reduced report runtime by ~85–90%.
- Owned full client onboarding lifecycle for 11+ clients, spanning source schema design, iterative data QA, source-to-target mapping, and model initialization for launch.
- Designed and implemented data ingestion pipelines in Python and Airflow, standardizing and transforming client source data into clean, analysis-ready schemas that power core product features.
- Collaborated cross-functionally with CSM, client data teams, and internal stakeholders to translate business requirements into data pipeline specifications.

Rock Climbing Instructor · The Gravity Vault 09/24 - 05/25

Business Intelligence Analyst · Acquire Beauty 03/24 - 09/24

- Developed and deployed NetSuite scripts to streamline data integration and improve supply chain system efficiency and scalability.
- Optimized inventory tools using Power Query, increasing data processing speeds by 2x and boosting supply-planning productivity.
- Developed automated Excel solutions using VBA, enabling real-time reporting and cutting manual data processing time by 50%.

Software Engineer · Bliss Point Media 05/22-08/22

- Owned development of React internal tools to improve client data workflows and reducing client onboarding time by 40%.
- Built and tested a new UI to allow effortless configuration of ad-metric filtering preferences for clients.
- Refactored internal code libraries to improve the configurability of real-time automated Slack notifications.

Calculus II Teaching Assistant · Carnegie Mellon University 01/21 - 05/21

- Led virtual recitations for 30+ students bi-weekly, clarifying complex concepts discussed in lectures.
- Managed grading for 200+ students, ensuring accuracy and providing timely feedback to support academic progress.

Projects

BoomFit · 2022

- A mobile Figma prototype that intelligently transforms lifestyle aspirations of older adults into realistic and achievable fitness goals.
- Designed and prototyped in Figma as part of 2022 CMU XHacks.

SpLaTeX · 2022

- A Python-based web app built with Flask, incorporating Google Cloud's APIs to convert speech into LaTeX code via NLP models.
- Earned 3rd place at Hack CMU.

mini motorways · 2022

- A recreation of the Apple Arcade game "Mini Motorways" built entirely in Python using PyGame.
- Utilized OOP principles, data structures, and graph algorithms to optimize game mechanics like traffic flow and pathfinding.

Skills

Design UI/UX • Figma • Prototyping • User Research
Information Architecture • Interaction Design

Programming React • Svelte • TypeScript • JavaScript
Python • SQL • HTML • CSS • Git • OOP

Language French (Intermediate) • Albanian (Intermediate)
